

CSHSE · ACCREDITATION SELF-STUDY PORTAL

Program Coordinator Training Webinar

How to prepare, edit, and submit your Self-Study — and what's coming next.

Webinar · **May 20, 2026**

Production <https://cshse.up.railway.app>

Dev preview <https://cshse-develop.up.railway.app> (AI Import Wizard demo)

What we'll cover today

Role-by-role walkthrough + in-development features previewed on the dev environment.

- | | | |
|---|---------------------|--|
| 1 | Orientation | CSHSE, the Self-Study, the four roles, signing in. |
| 2 | Program Coordinator | Dashboard, editor, evidence, matrix, validation, submit. |
| 3 | Reader | Review interface, comments, scoring 0–3, 45-day deadline. |
| 4 | Lead Reader | Compilation, disagreements, final determination, change requests. |
| 5 | Administrator | Users, institutions, standards documents, handbook library, templates. |
| 6 | Superuser & Roadmap | Technical-admin role + what's shipping in Sprints 1–7. Q&A at the end. |

The Self-Study, in one page

Two required components. Everything in the portal is in service of these two.

1. NARRATIVE RESPONSE

Written prose organised by Standard and by Specification (e.g., 11a, 11b). For each Spec, explain how the program complies and cite the specific syllabus, assignment, or document that proves it.

- Edited inline in the portal (TipTap editor).
- Auto-saves while you type.
- Submitted Standard by Standard for validation.

2. SUPPORTING DOCUMENTATION

Uploaded files plus external hyperlinks that prove every narrative claim. PDF strongly preferred. Links must work and must NOT be password-protected.

- Syllabi, matrix, advisory minutes, surveys, handbooks.
- Catalog, budget, learning-outcomes data, certificate page.
- Each file links to one or more Standard / Spec.

Four roles, one portal

The same screens — gated by role. Permissions are enforced on every request.

Program Coordinator

Institution staff

Prepares, edits, and submits the Self-Study. Uploads evidence, manages the matrix.

Reader

External reviewer

Reads assigned submissions, scores each Spec 0–3, adds comments. 45-day deadline.

Lead Reader

Senior reviewer

Compiles all reader assessments. Resolves disagreements. Issues final determination.

Administrator

CSHSE staff

Invites & assigns users, manages institutions, maintains the standards documents, handbook library, and templates.

*Plus a technical role: **Superuser** — configures N8N webhooks, manages API keys, and handles data-management operations. May impersonate other roles (audited).*

Signing in & finding your work

Production today · Dev environment is for previews only.

- 1 Go to <https://cshse.up.railway.app>
- 2 Sign in with the email CSHSE invited (check spam folder).
- 3 Land on /dashboard — content is filtered by your role.
- 4 Click Self-Study in the header to see your submissions.

Forgot your password?

Today: ask your CSHSE admin to send a reset. Self-service reset is shipping in Sprint 2 (S2.2).

SECTION 2

Program Coordinator

Edit narratives · Upload evidence · Build the curriculum matrix · Submit for review.

Your dashboard

Everything for your institution, all in one screen.

Submission status

Where your Self-Study sits in the workflow (draft, validating, submitted, under review).

Upcoming deadlines

Initial accreditation has a hard 2-year cap. Cycle reminders shipping in Sprint 6.

Site visit schedule

If a site visit is scheduled, its date and itinerary appear here.

Submitted change requests

Deadline-extension and visit-reschedule requests you've filed.

Self-Study Editor — the three-panel layout

Standards on the left · your work in the middle · validation & comments on the right.

PROGRAM
COORDINATOR

STANDARDS

-  Std 11 Curriculum
-  Std 12 Field experience
-  Std 13 Self-assessment
-  Std 14 Faculty
-  Std 15 Administration
-  Std 16 Library
-  Std 17 Students

Standard 11 — Curriculum

Specification 11a

VALIDATION

Passed 2026-05-18

[Re-validate](#)

COMMENTS

Reader 1: needs syllabus reference

3 unresolved

Status dots: gray = not started · yellow = in progress · blue = ready · orange = submitted · green = validated · red = failed

Writing your narrative

TipTap rich-text editor · auto-saves while you type · formatting + tables supported.

What you can do

- Bold, italic, headings, lists, tables.
- Insert images and inline links.
- Type by Specification (e.g., 11a, 11b).
- Auto-save fires while you type — no Save button.
- Cite the document/syllabus/page that proves each claim.

Good practice

- Every claim should point at a specific document, syllabus, assignment, or page.
- Keep prose tight — readers score against the rubric, not word count.
- Re-validate a Standard after every meaningful edit so status stays accurate.
- Use the Comments panel to talk back to reviewer feedback — replies are allowed.

Evidence — files and links

Three places you can upload · PDF strongly preferred · links must work and not require login.

Evidence Manager

Full library view. Bulk uploads, filter by Standard, link a file to one or more Specs.

Evidence Panel

In-editor side panel — upload while writing the narrative for that Specification.

File Library

Standard-by-Standard accordion. Newly uploaded files appear immediately.

Handbook rules the portal will enforce

- PDF strongly preferred. Upload a .docx and you'll see a soft-block prompt (Sprint 1, S1.4).
- URL evidence is probed on save — broken / password-protected links are flagged red (Sprint 1, S1.3).
- Re-uploading a file creates a new version; the old one is kept for audit.

Curriculum Matrix

Courses × Specifications grid. Each cell carries content-type letters (I/T/K/S) and depth (L/M/H).

What goes in a cell

- I — Introduction
- T — Theory
- K — Knowledge base
- S — Skills / field-experience practice

Plus one depth letter:

- L — Low · M — Moderate · H — Heavy

Example cell value:

I, T, H

Each matrix-listed course must also be referenced in the narrative.

Matrix preview

	HSV101	HSV210	HSV330	HSV450
11a	I, L	T, M	K, H	S, H
11b		T, L	K, M	S, H
11c	I, L		T, H	K, M
11d	I, M	T, M		S, H

**SPRINT 4 · TEMPLATE-
DRIVEN**

Validating & submitting a Standard

When you click Save & Validate, the portal asks an AI workflow whether your narrative reads as compliant.

- 1 Click Save & Validate at the top of a Standard.
- 2 The Standard moves to Submitted (orange). Validation usually completes in a minute or two.
- 3 Outcome: Validated (green ✓) or Failed (red ✗). Failures show specific feedback to act on.
- 4 Edit, Re-validate, and watch the status flip. Repeat per Standard.

Coming in Sprint 3 — Evidence AI Review

Today the AI reads your narrative and a snippet of any referenced links. Next: the AI opens each uploaded evidence file (PDF, DOCX, image OCR) and reports whether it actually supports each Specification — surfaced as ✓ supports / ● partial / ✗ not relevant pills next to every file.

Site visits & change requests

SITE VISITS

Required for Initial accreditation and every 10 years. 2–3 days, ~11 meetings per the Handbook's sample agenda.

- You see scheduled dates on your dashboard.
- Itinerary is built and visible once finalized.
- Mock-visit checklist + template — Sprint 6.

CHANGE REQUESTS

Submit two kinds of requests. The Lead Reader approves or denies.

- Deadline-extension request — explain the reason.
- Site-visit reschedule request — propose new dates.
- Email notifications fire on submit/approve/deny.
- Status tracked from your dashboard.

Coming soon — the AI Import Wizard

PROGRAM
COORDINATOR

Demo on <https://cshse-develop.up.railway.app> · ships to production once UAT closes.

The problem it solves

Today: paste a legacy Self-Study DOCX into the portal and re-tag every section by hand. Tedious for 250-page documents. The wizard ingests the whole document, asks an AI to suggest which Standard / Spec each section belongs to, and lets you accept or reassign before applying.

1 Upload

Drag in a .docx, .pdf, or .pptx of the legacy self-study.

2 AI parse

Mammoth / pdf-parse extracts the text; an AI matcher tags each section.

3 Review

Full-text cards grouped by kind: Narratives · Evidence text · Files · Matrix cells.

4 Apply

Accept the AI's suggestions — narratives fill in, evidence files attach, matrix cells set.

Inside the wizard

The Review screen is where you spend the most time.

SPEC RAIL

11a	12 cards
11b	8
12a	5
12b	9
13	3
14a	11
14b	7
Matrix	4 cells
Files	21

EXTRACTED CONTENT — STANDARD 11a

NARRATIVE

"The curriculum follows a sequence beginning with HSV 101 ..."

EVIDENCE TEXT

"The curriculum follows a sequence beginning with HSV 101 ..."

MATRIX CELL

"The curriculum follows a sequence beginning with HSV 101 ..."

AI EVALUATION

Confidence

0.87

Suggested target

Standard 11a

Rationale

Mentions curriculum sequence and HSV 101 — direct match to 11a.

ACCEPT

SECTION 3

Reader

Read the Self-Study · comment on text · score every Specification · submit within 45 days.

Your dashboard

READER

You see only the submissions assigned to you.

Assigned submissions

Each row is one Self-Study you've been asked to read. Click to open.

Review deadline

45 days from assignment. Urgency pills shipping in Sprint 3 (red <14d, amber <30d).

Assessment progress

How many Specs you've scored vs. total. Resume where you left off.

Communication

You may NOT contact the program directly. Route any questions through the Lead Reader.

Reviewing a Self-Study

Read-only narrative on the left. Your assessment tools on the right.

- 1 Click an assigned submission from your dashboard.
- 2 Use the Standards sidebar (left) to move through Standards and Specifications.
- 3 Read the narrative and click any cited evidence file to open it.
- 4 Score the Specification 0–3 and add your assessment comments.
- 5 Flag anything that needs the Lead Reader's attention.

Coming soon — Evidence pills next to every file (✓ supports · ● partial · X not relevant) — Sprint 4 (S4.1).

Comments & the 0–3 score

COMMENTS

- Select text in the narrative — the Add Comment button lights up.
- Click Comment, type your note, and save. It's anchored to that exact passage.
- Reply, resolve, or delete (your own) inside the sidebar.
- Coordinator can read & reply but never sees your real name (Sprint 1 — S1.1).

SCORING (0 – 3)

Non-compliant

Partially compliant

Largely compliant

Fully compliant

One score per Spec per reader. Lead Reader averages across the team.

What's coming for Readers

Sprints 1–4 ship these features.

S1.1

Identity redaction

Program Coordinator sees you as 'Reader 1' / 'Reader 2' — never your real name.

S4.1

Evidence pills

Next to every uploaded file: ✓ supports · 🕒 partial · ✗ not relevant — generated by the AI evidence review.

S4.10

Reader-report DOCX export

One-click button on the review-complete screen generates a CSHSE-templated Word report from your comments, organized by Standard / Sub-standard.

S3.9

45-day deadline tracking

Urgency pills on your dashboard: red <14d, amber <30d. Email reminders fire automatically.

S4.2

Save-and-Validate evidence tab

When the program asks for re-validation, you'll see per-file findings and a gap-analysis summary.

SECTION 4

Lead Reader

Compile every reader's assessment · resolve disagreements · set the final determination.

Your dashboard

Submissions in your oversight plus pending decisions.

Submissions in oversight

All institutions you're the Lead Reader on — with status of each reader's work.

Pending change requests

Deadline-extension and visit-reschedule requests from coordinators — your call to approve or deny.

Site visits

Visits scheduled where you're the lead site visitor.

Compilation status

Which submissions are ready for you to compile (all readers done).

Compilation tab — side-by-side review

LEAD READER

Open Self-Study → Compilation. See every reader's score and comments, Spec by Spec.

STANDARD 11 — Specification 11a · Curriculum begins with HSV 101 ...

Reader 1

3

Reader 2

2

Reader 3

1

Final

?

DISAGREEMENT — scores span 1 to 3. Reader 3 flagged 'missing field-experience evidence'. Reader 1 saw it on page 47.

- Disagreements are highlighted automatically. Resolve by reading each reader's note and setting the Final score.
- Use the Comments thread to ask a reader for clarification (you can DM through the portal — no direct PC contact).
- When every Spec has a Final score, generate the compilation report.

Change requests & what's coming

CHANGE REQUESTS

Coordinators ask. You decide.

- Deadline-extension requests — review the reason, approve or deny with comment.
- Site-visit reschedule requests — same workflow.
- Notifications fire on either decision.
- Routes any program questions through CSHSE VPA — never direct.

COMING SOON FOR LEAD READERS

- Per-reader DOCX reports auto-collected — download from the compilation view (S4.10).
- Common-error checks before submit: matrix↔narrative congruence, missing Specs, missing required documents (Sprint 5).
- Pre-submit Completion Checklist gates the program from submitting until everything is in (S5.4).
- Board-decision flow — informal email at +0, formal at +30 days, website post once (S6.1).

SECTION 5

Administrator

Users · institutions · standards documents · handbook library · templates.

Admin Settings

Settings link in the header. Header reads "Admin Settings — Manage users, institutions, and spec documents."

Users

Invite, edit roles, disable, assign to institution.

Institutions

Create institutions, set accreditation deadlines, assign reader teams.

Spec Documents

Upload and version the official CSHSE Standards PDFs per program level. Load to the AI matcher.

Dashboard Files

Upload spec files and matrix templates that PCs see on their dashboard.

Help Documents

Upload the Handbook and any reference docs into the in-portal AI help-chat knowledge base.

Note: *N8N Webhook, API Keys, and Data Management are **Superuser-only** — they do not appear in your Settings sidebar.*

Inviting users

Every account starts with an invitation. The user sets their own password.

- 1 Settings → Users → click Invite User.
- 2 Enter the email address and pick a role (Program Coordinator, Reader, Lead Reader, Admin).
- 3 For Program Coordinators: select the institution to attach them to.
- 4 Send. The user gets an email with a one-use link to set a password.

Coming in Sprint 2 — Multi-PC support (S2.10)

One institution will be able to have ≥ 1 Program Coordinator (e.g., Bachelor's + Master's chairs). Same permissions across all coordinators; UI uses chips to add and remove.

Institutions

One row per program. The reader team is set here.

Institution checklist

- Name, program level (Associate / Bachelor's / Master's), contact info.
- Accreditation deadline (used to drive the cycle-scheduler in Sprint 6).
- Assign a Program Coordinator (or a list — Sprint 2 ships multi-PC).
- Assign a Lead Reader and 2–3 Readers.
- Create the initial Submission record so the coordinator has somewhere to write.

Coming in Sprint 7 — Joint Ventures (cosmetic groupings)

- Group 2+ institutions into a named 'Joint Venture' for dashboard / report grouping.
- Permissions DO NOT change — a PC of inst A still only sees inst A's work.
- Filter reports by JV, see aggregate stats per JV, badge institutions belonging to one.

Standards documents, handbook & templates

ADMINISTRATOR

TODAY

- Spec Documents tab — upload a new Standards PDF per program level. Versioned with revision dates.
- Load-to-AI button — sends the spec to the matcher so validation knows the latest text.
- Dashboard Files tab — upload PDFs / templates that appear on a PC's dashboard for download.
- Help Documents tab — upload the Handbook + reference docs into the AI help-chat knowledge base.

IN DEV — ADMIN-FACING

- Matrix Templates registry (S4.8) — Associate / Bachelor's / Master's matrix DOCX, versioned.
- Reader-report templates page (S4.10) — upload one DOCX per program level for reader exports.
- Email Settings — admin-readable view of SMTP host, sender, domain + Send test email (S3.7).
- Multi-PC assignment per institution (S2.10).
- Account lockout + Unlock button (S2.1) and password-reset audit trail (S2.7).

Superuser — the technical admin

Separate role from Administrator. Different Settings page — header reads "Superuser Settings."

Who & what

A global flag on a user account. Superusers see ONLY the technical tabs by default. To do user / institution work they impersonate the Administrator role — every impersonation is audited (S1.2).

N8N Webhook

Configure N8N validation webhook URL, callback URL, auth headers. Test the connection.

API Keys

Generate, list, rotate, and revoke API keys used for webhook callbacks and external integrations.

Data Management

Destructive operations: delete an institution's self-study data, GridFS stats, orphaned-file cleanup.

Sprint roadmap — at a glance

Sprint 1 is in UAT today. Everything else ships in order.

1	AI Import Wizard	Today on /develop · UAT in progress.	UAT
2	Compliance + critical security	Reader-identity redaction, URL probe, PDF preference, JWT secret, HMAC webhooks.	Next
3	Auth hardening + multi-PC	Rate limit + lockout, forgot-password, JWT refresh, Zod input validation, multi-PC.	Planned
4	Evidence AI review + emails + reader deadlines	AI reads each evidence file. Wired email to every workflow event. 45-day deadlines.	Planned
5	Evidence UI + matrix editor + reader-report DOCX	Pills in 3 surfaces, template-driven matrix, multi-matrix, DOCX export.	Planned
6	Common-error checks + completion checklist + tests	Pre-submit gate, mechanizable checks, ≥60% coverage.	Later
7	Board decisions + cycles + E2E + polish	Decision flow, 5/10-yr cycles, accessibility, ops runbooks.	Later
8	Joint Ventures	Cosmetic groupings of 2+ institutions for reporting.	Later

Recent changes you'll notice

If you used the portal last month, a few things moved.

- AI Import Wizard tab on the editor top bar (dev environment only for now) — replaces the legacy 'Import Document' button.
- Review surface redesigned — full-text cards grouped by kind, with AI confidence + rationale on the right.
- Matrix cells now show comma/space-separated codes correctly (e.g., 'I, T, H').
- ParseStep shows per-stage progress bars, an elapsed timer, and a stall detector (warns if stuck >30s).
- Apply now writes a styled 'AI Analysis' block at the top of each populated narrative — confidence, accept-state, rationale.
- Stevenson smoke test is in progress on <https://cshse-develop.up.railway.app> — ask if you'd like to watch a live run.

Tips for a clean Self-Study

Do

- Cite a specific document, syllabus, or page for every claim.
- Upload PDFs. They render reliably and are the Handbook's preferred format.
- Re-validate a Standard after every meaningful edit.
- Reply to reader comments — replies are allowed and encouraged.
- Run the Completion Checklist before submitting (Sprint 5).

Avoid

- Password-protected Google Doc links — readers can't open them.
- Generic 'see appendix' references with no page number.
- Long narratives that bury the citation. Readers score against the rubric.
- Re-importing the same legacy DOCX after edits — use the editor instead.
- Submitting a Standard while validation is still running.

Where to get help

Help chat (in-portal)

RAG-powered chat answers questions about the 2024 Member Handbook and how the portal works. Session-bound to your account (Sprint 1 — S1.9).

CSHSE VPA

Vice President for Accreditation. Coordinates everything Council-side — assignments, deadlines, decisions.

Board Member-at-Large (Consultant)

Assigned to your program as a consultant for the writing process. Available for questions. NOT a reviewer.

Update Management, Inc.

Membership / accreditation applications, dues, fees. External to the portal.

Forgot password (today)

Email your admin. Self-service reset shipping in Sprint 2 (S2.2).

URLs and environments

Two separate sites. Don't confuse them.

PRODUCTION — real work happens here

<https://cshse.up.railway.app>

- Your real Self-Study lives here.
- All data is the live production data.
- Use this for every real edit and submission.
- AI Import Wizard is NOT here yet (Sprint 1 UAT first).

DEV PREVIEW — for demos only

<https://cshse-develop.up.railway.app>

- What ships next — preview the AI Import Wizard.
- Data here is throwaway. Don't enter real submissions.
- Used by CSHSE for smoke tests and acceptance.
- Push to production happens once UAT closes.

One-page cheat sheet

Save this slide — covers the most-asked questions.

Sign in	https://cshse.up.railway.app · email + password set from invitation.
Open my Self-Study	Header → Self-Study → click my institution's submission.
Edit a narrative	Standards rail (left) → Specification → type in the editor (auto-saves).
Upload evidence	Evidence tab OR side panel in the editor. PDF preferred.
Validate a Standard	Click Save & Validate on the Standard. Wait ~1 min for green/red.
Reply to a reader comment	Open the Comments panel → click Reply on the comment.
Request a deadline extension	Dashboard → Change Requests → New → Deadline Extension.
Forgot password	Email CSHSE admin. (Self-service reset ships Sprint 2.)
See AI Import Wizard demo	https://cshse-develop.up.railway.app (dev preview only).

Q&A

Bring the screen-shares — we'll walk anything you've seen on the portal, live.

Production: <https://cshse.up.railway.app>

Dev preview: <https://cshse-develop.up.railway.app>
